- Consumer Packaged Goods
- Communications/Media/Energy
- Travel & Leisure
- Financial Services
- Transportation

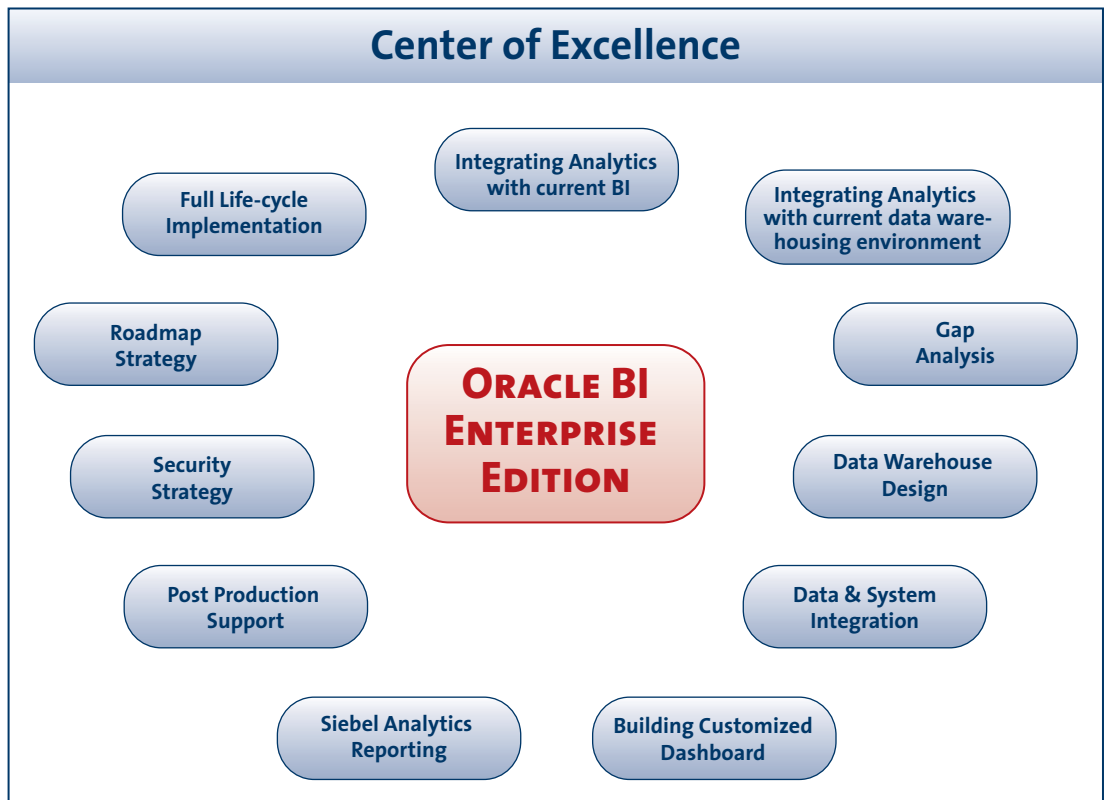

Oracle Business Intelligence Suite Enterprise Edition Plus (OBIEE Plus) is a comprehensive suite of enterprise business intelligence (BI) products that delivers a full range of capabilities including interactive dashboards, full ad hoc queries, proactive intelligence and alerts, enterprise and financial reporting, real-time predictive intelligence, disconnected analytics, and more. The products in the suite are based on a proven Web service-oriented architecture that integrates with an organization's existing information technology (IT) infrastructure for the lowest total cost of ownership (TOC). OBIEE Plus provides complete, relevant insight to everyone in an organization and that, in turn,

results in better decisions, informed actions, and more-efficient business processes.

The ObjectWin OBIEE Practice offers services ranging from data warehouse design and application design, to ETL development, plus report and dashboard design and development. It extends to upgrades and conversions, as well as iBot design and development. ObjectWin provides the technical expertise, business domain experience, as well as the execution required to bring you to a complete solution.

Oracle BI Enterprise Edition Services

ObjectWin's Siebel Analytics competency delivers Siebel Analytics-based customer intelligence solutions and services that empower enterprises to unlock the value hidden in data and obtain real time customer insights. We help you enable data access from multiple disparate sources, existing production databases and applications across the enterprise so that enterprises can rapidly analyze information, thus facilitating quicker decision making.

ORACLE PARTNER
