

SAP Upgrade

SAP Upgrades presents an opportunity to extract the best returns from your long-term investments on SAP at a low incremental cost, thereby increasing productivity and the much required competitive advantage. Every organization faces different SAP upgrade challenges and needs customized solutions for their unique IT Landscape.

Despite all the benefits, an SAP upgrade project can be intimidating. Lack of insight to estimate time, resource requirements, and limited in-house knowledge can make the task very daunting. An upgrade project, when done correctly, can overcome all those challenges with a RIGHT Partner.

ObjectWin can help you with your SAP upgrade and enhancements by using our experience and global delivery advantage by keeping total cost of ownership under control. Our capability to simulate the upgraded environment and performance of a pre-upgraded assessment will illustrate the impact of the upgrade without changing or effecting the live SAP environment in any way. Accurate assessment of magnitude and potential upgrade issue(s) in advance can help you to lead detailed deliverable and project schedules.

ObjectWin provides a complete range of offerings from consulting, managed services, training and support for SAP Upgrades and Enhancements. We will work with you on all stages – planning, implementation, operation and ongoing optimization of your SAP landscape.
