Microsoft SOA & Business Process

Business Processes often touch multiple facets of various applications. At ObjectWin, we can help by integrating these applications and using the capabilities of the Microsoft platform. This allows for a more highly controlled technology infrastructure and more appropriately tasked employee base within the organization. By automating the workflow of business processes, you can create another area of significant value within your organization. Let ObjectWin's technical expertise and diverse solutions experience help you with that process.

Our Offerings

- Transactional, Message Based Integration
- Batch-Oriented Data Integration
- Complex Workflow and Orchestration
- Legacy Application Integration (Mainframe/AS-400)
- Custom Adapters for BizTalk and Integration Services

ObjectWin has proven proficiency in implementing and deploying server-based portals for driving Internet commerce, and business process applications featuring:

- Enterprise Application Integration (EAI)
- Business-to-business application integration
- Business Process Management (BPM) Internet Business
- Digital Rights Management
- Extranet/Hosting
- Web Application/Portal Development
- Web Based Workflow/Orchestration Solutions

ObjectWin takes advantage of the latest technologies to help organizations build integrated, interoperable, modularized, extensible, and secure e-business solutions that connect information, systems, people, and processes.

Key Benefits

- Reduces the cost to develop and maintain frequently changing, complex business rules
- Empowers business users to write and maintain business rules directly, without intermediate requirements documents
- Provides controls to help ensure security, compliance, and quality
- Gives developers the tools to easily incorporate business rules within BizTalk Server and other .NET applications
