

## Jump Start Your Business Objects Implementation

### Install and Configure

The Install and Configure Engagement allows our clients to deploy or re-deploy their existing BI platforms across their respective environments (typically Development, Test, and Production). Our consultants are highly proficient and capable of morphing themselves not only into your environment, but also into your requirements. This helps deliver a clear-cut, professional solution for your organization.

- Creation of Users and Groups
- Configuration of Associated Security and User / Group Privileges
- Installation and Configuration of Data Integration Services
- Localized Environment Testing; Service Instance Verification
- Knowledge Transfer and Suggest Best Practices

### Content Creation

The Content Creation engagement allows clients to expedite report creation and universe design to satisfy both immediate and long-term organizational reporting needs. Our consultants are highly proficient and capable of morphing themselves not only into your environment, but also into your requirements. This helps deliver a clear-cut, professional solution for your organization.

- Assess Reporting Requirements and Needs
- Collect, Analyze, and Conform Critical Dimensions
- Collect, Analyze, and Conform Critical Measures
- Creation of up to 5 Underlying Universes
- Association of Universes to Distinct Users and Groups
- Creation Life-cycle of up to 10 Overlying Reports
- Association of Reports to Distinct Users and Groups
- Implementation of Report Scheduling (if needed)
- Promotion Process of Reports from One Environment to Another

### Metrics & Dashboards

The Metrics & Dashboards Engagement creates the most Return on Investment on existing platform implementations. This is a viable solution for both non-ITIL and ITIL certified organizations of any size. Our proven solution will help recognize and adhere to help aid in logical and more effective decision making at all levels within your organization.

- Organizational Metric Scoping
- Source Data Analysis
- Universe Design
- Dashboard Development
- Organizational Return
