

BusinessObjects Rapid Marts

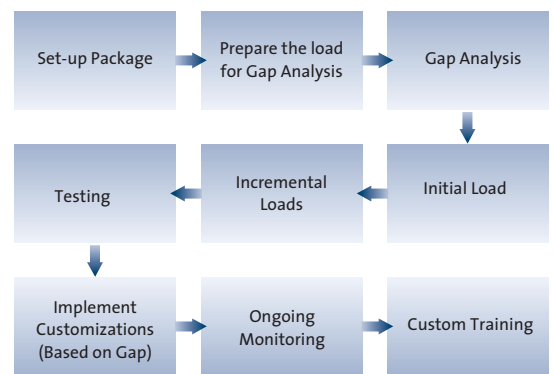

When it comes to getting data out of SAP, Oracle, Siebel, and others, many businesses with revenue of under a billion dollars struggle with the process. The complexity of data makes it close to impossible for mid-size companies to afford a data mart based on SAP data. Not only does ObjectWin help clients take incremental steps toward a full-blown data warehouse, but it also generates ROI while addressing urgent business needs with each step. Using the Rapid Mart solution, Business Objects brings a powerful offering to Tier 1 ERP vendors. By leveraging ObjectWin's proficiency with this solution, you can get the most from your Rapid Mart deployment.

As a Business Objects Gold Partner, ObjectWin is committed to delivering unparalleled value and industry-leading solutions and services to its customers. Becoming a Business Objects Gold Partner has demonstrated ObjectWin's expertise with Business Objects' technologies and proven the ability to meet customers' needs.

Together with Business Objects, ObjectWin helps organizations gain better insight into their business, improve decision making, and optimize enterprise performance. Business Objects Gold Certified Partners receive a rich set of benefits, including executive access, training, and support, giving them a competitive advantage in the marketplace. As a result, ObjectWin can build a positive customer experience with business intelligence technologies.

The Business Objects' Rapid Mart offering is very comprehensive because it packages both ETL scripts and a sample BI front-end. The single solution requires a competent understanding of the many processes from back-end to front-end. ObjectWin delivers cutting edge resources that understand both Enterprise Information Management and the degrees of implementing Business Objects' Rapid Mart solution. ObjectWin's documented approach for implementing Rapid Mart can guide your Rapid Mart implementation fluently and efficiently. The chart includes a few of the high level steps used by ObjectWin to service Rapid Mart clients.

Tandem Events

Why ObjectWin?

Being in business for over ten years now, ObjectWin has sufficient knowledge of building data warehouses than most IT consultancies due to the extensively documented best practices and procedures. Our successful consolidation and transformation of data to a single, pure and precise source of information, provides the basis for visual trending, analytics and reporting through our business intelligence practice. ObjectWin's business intelligence consulting services are focused on providing our clients the ability to fully understand and leverage corporate data. ObjectWin focuses on the following solutions:

- Business Intelligence Strategic Planning
- Architecture and Implementation
- Enterprise Reporting Solutions
- Tool Analysis and Recommendation
- Proofs of Concept and Prototypes
- Dashboards and Analytics
- Knowledge Transfer and Training
